A wavelength-dependent, optical model of human skin

Author: Carroll, Kevin Paul

Degree: Ph.D.

Year: 2000

Corporate Source/Institution: Texas A&M University (0803)

Co-Chairs: Glen N. Williams; Louis G. Tassinary

Source: VOLUME 61/04-B OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 2030. 182 PAGES

Descriptors: COMPUTER SCIENCE ; ENGINEERING, ELECTRONICS AND ELECTRICAL

Descriptor Codes: 0984; 0544

Kubelka-Munk theory is employed to develop a wavelength-dependent, optical model of human skin for use in computer graphics that is both biophysically informed and empirically tenable. Parameterization of the model includes separation of the optical characteristics of the structure of skin from the optical characteristics of the pigments. Given this separation, skin colors may be described in terms of pigment spaces rather than traditional RGB, CIE, etc. color spaces. Consequently, users are able to very quickly, accurately and intuitively produce a broad range of skin tones including subtle differences in skin color due to racial variation, freckles, and blushing.

Data used to build the model are extracted from full spectral analyses (380 nm to 780 nm) of the epidermis, dermis, and major visible light absorbing pigments (blood, melanin, bilirubin, and β -carotene) contained within the skin. Results from the model are verified by comparing the predicted remittance curves of a variety of skin colors to those obtained from both black and white individuals. The consistency of the remittance spectra predicted by the model with that obtained from *in vivo* measurements of racially diverse subjects suggests that the model provides a means of shifting the specification of **skin color** (in **computer graphics**) from what has often been a subjective perception, to an objective specification of measurable characteristics.

Dorsal skin color patterns among southern right whales (*Eubalaena australis*): Genetic basis and evolutionary significance

Schaeff, C M; Best, P B; Rowntree, V J; Payne, R; et al

Journal of Heredity (PHER), v90 n4, p464-471, p.8

Jul 1999

ISSN: 0022-1503 JOURNAL CODE: PHER

DOCUMENT TYPE: Feature

LANGUAGE: English RECORD TYPE: Abstract

ABSTRACT: Distribution and inheritance of dorsal skin color markings among two populations of southern right whales (*Eubalaena australis*) suggest that two genes influence dorsal **skin color**. The grey- **morph** and partial-grey-morph phenotypes (previously known as partial albino and grey-blaze, respectively) appear to be controlled by an X-linked gene, whereas the white blaze appears controlled by an autosomal gene (recessive phenotype).

ISBN: 0-599-80275-8

Women's decisions to have cosmetic surgeries are socially situated and experienced. This work explores women's stories of their cosmetic surgery experiences to better understand this growing cultural practice. Data was gathered utilizing in-depth, qualitative interviews with a snowball sample of twenty-one women who have had **cosmetic surgery**. Transcripts were **analyzed** using a grounded theory approach (Strauss and Corbin 1990). Utilizing symbolic interactionist theories, this research explores how women's appearances are socially accomplished through the *conversation of gestures* and the *generalized other* (Mead 1934). Key themes developed are women's experiences with aging, decision-making, and social networks. First, the practice of cosmetic surgery can be understood as a response to the "mask of aging" (Featherstone and Hepworth 1991) and the implications of this for the creation of participants' selves. Questions of identity and aging are explored when describing the tension research participants experienced between how they look and how they feel. Cosmetic surgery succeeds in easing the mask of aging, yet surgery may create new types of masks. Second, the importance of social networks in women's decisions to have cosmetic surgery is described. A technique of reflexive accounting is utilized to explore the importance of social relationships in the cosmetic surgery experience. Research participants' friends and doctors suggest cosmetic surgeries and influence participants' decision-making. Third, participants' beliefs about surgery are reflected in their discourses. The two primary discourses are *minimizing* and *"I did it for myself"*. These discourses serve to mediate the highly social and political nature of cosmetic surgery thereby reinforcing social structures and social inequalities. A primary theoretical contribution is to work away from the binary framing in other studies and utilize a more dynamic process-oriented analysis. By examining the importance of appearance and beauty in women's lives, this research unites and expands previous research on cosmetic surgery by focusing on how the social importance of age and gender are culturally constructed in women's bodies through cosmetic surgery practices.

This study examines the roles ethnicity/race, sex/gender and compulsory heterosexuality play in the practice and experiences of facial cosmetic surgery. First it reviews professional literature on cosmetic rhinoplasty, from the years 1966 to 1996, in order to assess how socio-economic and medical changes have affected the psychological and surgical discourses of aesthetic rhinoplasty. Second, it analyzes open-ended interviews with fifty post-operative facial cosmetic surgery patients, men and women of various ethnic/racial backgrounds, focusing on how these individuals interpret their decisions to have surgeries as well as the operations' effects on their lives.

My findings indicate that the medical discourses on cosmetic rhinoplasty function as disciplinary regimes that essentialize sex/gender and promote an idealized (Northwest European) whiteness. On the surface, medical writings appear to have responded to the multi-cultural discourses of the past thirty years, but a closer reading reveals that they have merely incorporated the superficial elements of this rhetoric. As a result, they either remain imbued with sexist and racial stereotyping or keep silent on the topic of ethnicity/race, pathologizing; anyone who expresses feelings of difference.

Individuals who **choose** to undergo facial **cosmetic surgeries** are classified according to three types: Avatars, aesthetes, and advancers. These categories combine the social, personal and occupational pressures that respondents identify as motivating their decisions for aesthetic surgeries.

While respondents usually admit that they seek aesthetic surgeries as a way to become more conventionally attractive, patients deny the their operations have had anything to do with ethnic passing. A more critical review of their accounts indicates that it is, in fact, the tenor of medical writings on ethnicity, along with contemporary media portrayals of ethnicity, that have, to a significant extent, made ethnic passing no longer an admissible justification for seeking surgeries, even though it is quite real as an unconscious motivation.

Ultimately patient narratives and medical writings suggest that facial cosmetic surgery is about cultural mainstreaming. Given the popularity of aesthetic surgery, the future promises to be one of continued homogenization.

A cross-sectional postal survey of 61 women on NHS waiting lists for cosmetic breast surgery (47 awaiting breast reduction and 14 awaiting breast augmentation) and 75 women who were not seeking cosmetic breast

surgery. The groups were compared using a number of standardised measures, as well as demographic and physical variables, and relevant qualitative information. In addition, the Theory of Planned Behaviour (Ajzen, 1988) was proposed as a useful means of understanding the decision to seek cosmetic breast surgery and relevant measures were administered.

Significant differences were found between women seeking cosmetic surgery and those who were not in terms of body image, self esteem, and physical functioning. Significant differences were found between women seeking breast reduction and augmentation in terms of physical functioning and weight related concerns. The relevance of the Theory of Planned Behaviour to the decision to seek cosmetic breast surgery was largely supported by the findings. Themes drawn out from the qualitative data generally supported the quantitative findings but also indicated the importance of social and cultural issues.

A number of criticisms are levelled at the methodology and the implications of the findings are discussed and the need for further research is emphasised.

ABSTRACT: Cosmetic surgery not only makes improvements to one's physical appearance, but also has an effect on the psyche, bettering self-esteem. Psychological problems stemming from perceived physical flaws can be eased with the surgical procedures, which can appear to be a more permanent fix than therapy or antidepressants.

Eaton, Lynn

The Independent, pS6(1)

Jan 7, 1997

ISSN: 0951-9467

LANGUAGE: English

RECORD TYPE: Abstract

ABSTRACT: It is believed that around 65,000 people had some form of cosmetic surgery in the UK in 1995, of whom 90% were women. It is becoming increasingly common for ordinary people, rather than celebrities, to **choose cosmetic surgery**. In many cases, they feel pressured by a competitive, ageist society to attempt to regain their youthful looks. Experts warn that cosmetic surgery does carry risks, and potential patients should think carefully before going ahead.

ABSTRACT: The American Academy of Cosmetic Surgery reports that men now account for 25 to 30 percent of cosmetic surgery patients, up from 10 percent less than a decade ago. The most popular procedures for men are hair restoration, nose jobs, liposuction, and eyelid surgery. In contrast to women, who **choose cosmetic surgery** to look better, men are concerned about competing in an increasingly youth-oriented job market.

ABSTRACT: According to the American Society of Plastic and Reconstructive Surgeons, the number of cosmetic surgery procedures performed each year in the United States has risen by 69 percent since 1981. Members of the society reported that in 1990, an estimated 644,000 procedures were performed. In most of the country, cosmetic surgery is still viewed as a luxury, but in Palm Springs, California, it is seen as a necessity, says surgeon James Yahr. According to Jan Curran, a society writer for the local newspaper, the Desert Sun, women get their plastic surgeon referrals at parties and from hair stylists, not from the local medical society. Sidebars list the frequency and cost of several types of cosmetic surgery and present results from a Health-Gallup Poll of 1,015 adults **surveyed** about their opinions of **cosmetic surgery**.

ABSTRACT: According to a recent **survey** by the American Academy of **Cosmetic Surgery**, approximately 20 percent more men underwent cosmetic surgery in 1987 than in 1986. According to one physician, a substantial number of middle-aged men share their younger counterparts' desire for plastic surgery, often because middle-aged men today are in great shape and want faces to match their bodies. Moreover, men are now more at ease about taking advantage of salon skin services and buying skin-care products. Men's hair- and skin-care products are recommended.

ABSTRACT: People may **choose** to have **cosmetic surgery** on the skin around the eyes for aesthetic reasons or because sagging skin is weighing on the eyelid, causing partially blocked vision or eyestrain. The method of treatment depends on the problem. Sun-damaged skin is often best treated with a chemical peel. Heavy, sagging eyelids caused by excess fat call for blepharoplasty, or surgical removal of skin, muscle, and fat. This operation, which can be performed in a doctor's office under local anesthetic, takes from 45 minutes to an hour. As with any surgical

procedure, there is a possibility of infection or visible scarring. The American Society for Dermatologic Surgery, the American Academy of Facial Plastic and Reconstructive Surgery, the American Academy of Cosmetic Surgery, or a local medical society can provide the names of qualified surgeons.

ABSTRACT: PART OF A SPECIAL SECTION ON WOMEN'S LIVES AFTER FORTY. Cosmetic surgery has helped many women, like former model and current television personality Sunny Griffin, but it does have risks. Forty-four year old Griffin has undergone two successful eyelid operations and a coronal (temple) lift. She advises women to keep their expectations down to earth. Plastic surgeon Robert Schwager comments that a face-lift will not change basic features. Faces will usually have bruises for a short period after a face-lift, and full recovery takes three to four weeks. A small number of face-lifts lead to paralysis when facial nerves are damaged; some restorative surgery can help bring back movement, however. Another danger is the removal of too much skin, giving the face a tightly stretched look. Potential complications during nose jobs include penetration of the brain and breathing problems. If considering **cosmetic surgery**, conduct research and **choose** a doctor carefully.

ABSTRACT: Nuclear missiles could be zooming in all directions and earthquakes and plagues devastating the planet, but as everybody (especially in Hollywood) knows, there's nothing worse than a bad hair day. Joan Rivers would understand. Beyond **cosmetic surgery** and **selecting** the right dress, a woman's choice of hair color and style can spell the crowning difference between being deemed a lady or a tramp while making that perilous journey down the red carpet into the awards show ceremony. And speaking of awards, forget the Oscars and the Golden Globes. The only Hollywood competition that really matters is the World Freestyle Hairdressing Championship. Never heard of it? Well, 'The Big Tease,' a campy, moderately amusing new comedy, will take you behind the scenes at this ultraexclusive event in which the world's leading hair stylists battle tooth and nail, comb and curler, for the Platinum Scissors Award, a priceless pair of gleaming shears once possessed by Czar Nicholas II. But seriously, folks: if you have overdosed on the preening narcissism and nutty hyperbole of recent Hollywood awards ceremonies and their surrounding hoopla, this funny but ramshackle movie might be the purgative you need. A mock documentary directed by Kevin Allen, 'The Big Tease' follows Crawford Mackenzie (Craig Ferguson), an indefatigably cheerful hairdresser from Glasgow, all the way to Los Angeles, where he arrives under the mistaken impression that he is an official contestant.

Claim

Field of the Invention

This invention generally relates to **computer imaging** programs and,
more
specifically, to a method and apparatus for manipulating digital
photographs.
Background of...

...plastic or llcosmetic" surgeons and potential patients. People are with
increasing frequency consulting physicians about **cosmetic surgery** .
While in many cases the patients considering **cosmetic surgery** have an
impressive understanding of the procedures available and medical terms
used to describe these...

...that the slightest miscommunication may result in dire consequences.
This has promoted the use of **computer imaging** to facilitate
communication between the physician and prospective patient.
Specifically, high-end aesthetic imaging systems...

...hinder rather than help the physician in demonstrating the results that
may be achieved through **cosmetic surgery** . Among others, a
disadvantage of existing aesthetic imaging programs is that a physician
or facilitator...

...SPECIFICATION and the makeup simulation unit 3 will now be explained.

Using this simulation, simulations of **makeup** , **cosmetic surgery** ,
clothing, perfume, accessories, hair style, etc., may be provided based
on 3D information. In addition, using **morphing** technology as described
below, information to enable one to resemble one's favorite model may...
...images resembling a cross between oneself and one's favorite model may
be created through **morphing** technology, and the desired image may be
selected. The user can learn what percentage of...

Abstract (Basic): EP 1089208 A2

NOVELTY - Average face composition is produced by computer graphic methods surveying average facial features, skin color, lip color and eye color among many faces representing different human races. Enquiries are performed among different people to receive their replies to questions on the obtained faces on which various cosmetics were furnished. The collected comments were analyzed to prepare color maps, whereby necessary information and images were established to enable selection of suitable cosmetics.

DETAILED DESCRIPTION - INDEPENDENT CLAIM is also included for the following:

(a) method of facilitating selection between cosmetic products
USE - For cosmetic selection using computer graphic.

ADVANTAGE - Enables the selection of cosmetics for all users, corresponding with the facial features, skin color and eye color.

DESCRIPTION OF DRAWING(S) - The diagram shows the color of the skin looks healthy

Abstract (Basic): WO 9307561 A

The appts. (10) includes an overhead projector (29) aligned to project light upon a three-dimensional object (12). A user interface (32, 42, 52) receives data from the user. The data is representative of a portion of an image to be projected upon the three-dimensional object.

A data processing device, which includes a **computer graphics** system, processes data corresponding to the image to be projected upon the three-dimensional object, in response to data from the user interface (32, 42, 52). The data processing device controls the projector (2a) and a light filter (68).

USE/ADVANTAGE - Compensating for optical distortions when image projected onto 3D object, e.g optical engineering, video shopping, **cosmetic surgery** etc. Allows for interactive image modification.

Abstract (Basic): US 20020092534 A1

NOVELTY - A cosmetic surgery procedure is selected from
several surgery categories. At least one question regarding the body of
the patient is asked through the network, which is answered by the
patients based on which the potential effects that is to occur on the
patient's body by performing the selected surgery procedure is provided
as a preview

USE - For providing a preview regarding potential effects of
surgery through Internet.

ADVANTAGE - Since the preview regarding the potential effects of
the surgery is provided as a preview, the surgery procedure that is
required is chosen easily and efficiently.

DESCRIPTION OF DRAWING(S) - The figure shows the front view of a
woman's breast.

Abstract (Basic): WO 200206350 A1

NOVELTY - A process of crosslinking of at least one polymer selected from polysaccharides and their derivatives, using at least one polyfunctional crosslinking agent, comprises bringing the other into reaction with polymer in solid state, in course of hydration.

DETAILED DESCRIPTION - INDEPENDENT CLAIMS are also included for:

(1) process of preparation of injectable hydrogel from at least one crosslinked polymer selected from polysaccharides and their derivatives, comprising crosslinking of such polymer according to process as claimed, followed by expanding of crosslinked polymer by hydration;

(2) crosslinked polymer which can be obtained by crosslinking process as claimed;

(3) injectable hydrogel obtained by process of preparation as claimed; and

(4) filling-up gel for use in reparative or **cosmetic surgery**, based on hydrogel, optionally filled, or consisting of monophase hydrogel.

USE - In restorative or **cosmetic surgery** (claimed).

Abstract (Basic): WO 200123908 A1

NOVELTY - Person (50,51) is positioned in front of a camera (13).
The camera is vertically positioned until it is horizontally aligned
with desired features e.g. eye on the person. Angle of sonar device
(14) is changed in relation to the person based on the vertical
positioning of the camera. The sonar device (15) is operated to
determine distance of the person to the camera and the camera is
operated to produce the image.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for
automated image scaling system.

USE - For capture of image of persons head or other object for use
in fitting of eye glass frames to image of face, including measurements
as segment height for multi local frame or look of particular frame on
particular face. Also used in **cosmetics**, proposed **cosmetic surgery**
, security related **identification**, forensic **identification**, fitting
head wear or any other of multitude of purposes.

ADVANTAGE - Captures an image of a persons head or other object,
positioned in front of a camera and accurately performs scaling of the
head based on the distance of the head from the camera.

DESCRIPTION OF DRAWING(S) - The figure shows the automated image
scaling system with a subject person in place.

JP 2001000241	A		9	A45D-044/00	

Abstract (Basic): JP 2001000241 A

NOVELTY - A cosmetic treatment surgery is performed after a stage specified based on biorhythm of the operated person and the menstrual cycle divided into three stages of luteal phases at the ovarian follicle time of physiology. Surgery is performed at intervals of three weeks with a frequency of four times in one cycle specified by three months based on the menstrual cycle.

DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for auxiliary tool for cosmetic treatment surgery.

USE - For performing cosmetic treatment to customer.

ADVANTAGE - An outstanding cosmetic treatment can be given to a person by performing a continuation surgery at intervals of three weeks with a frequency of four times in one cycle specified as three months based on the menstrual cycle and biorhythm of person.

DESCRIPTION OF DRAWING(S) - The figure shows explanatory diagram of schedule card used in coordination with schedule **determination** auxiliary tool for **cosmetic surgery**.

Abstract (Basic): JP 11169358 A

NOVELTY - Image of a face for decision is picked up and the picked up image is altered to form a judgment image by applying brightness to specific areas of the image. The judgment image is assessed based on

outline shape of the areas or extent of limit between the areas.
DETAILED DESCRIPTION - An INDEPENDENT CLAIM is also included for face analyzing system.

USE - For diagnosis of beauty and ageing to enhance **cosmetic surgery** and for **identification**.

ADVANTAGE - Impression of face and condition of skin are diagnosed and is used effectively for decorative purpose. DESCRIPTION OF

DRAWING(S) - The figure shows block diagram of face analyzing system.

Patent Details:

Patent No	Kind	Lan	Pg	Main IPC	Filing Notes
US 4782725	A		11		

Abstract (Basic): US 4782725 A

The identification device includes a device body, a drive unit housed in the device body, and a sliding dovetail shaped armature with a horizontal slot. A needle bar is inserted into the armature and is secured by a spring loaded ball and screw. The armature moves in a vertical direction by means of its connection with a circular rotor attached to the drive unit.

The rotor has at its rear end an offset pin which engages the horizontal slot located at the upper front portion of the armature. The rotational movement of the circular rotor is translated into vertical motion of the sliding dovetail armature. This assures that there will be no horizontal displacement of the needle bar, thus achieving precise columniation of the needle bar and precise application of the identification ink.

USE - Reciprocating needle surgical instrument for marking skin for **identification** or **cosmetic surgery** purposes.

Title Terms: IDENTIFY; DEVICE; ANIMAL; HUMAN; SKIN; NEEDLE; BAR; INSERT;
ARMATURE; SECURE; SPRING; LOAD; BALL; SCREW

Abstract (Basic): EP 1089208 A2

NOVELTY - Average **face composition** is produced by **computer graphic** methods surveying average **facial features**, **skin color**, lip color and eye color among many faces representing different human races. Enquiries are performed among different people to receive their replies to questions on the obtained faces on which various cosmetics were furnished. The collected comments were analyzed to prepare color maps, whereby necessary information and images were established to enable selection of suitable cosmetics.

DETAILED DESCRIPTION - INDEPENDENT CLAIM is also included for the following:

(a) method of facilitating selection between cosmetic products
USE - For cosmetic selection using computer graphic.

ADVANTAGE - Enables the selection of cosmetics for all users, corresponding with the facial features, skin color and eye color.

DESCRIPTION OF DRAWING(S) - The diagram shows the color of the skin looks healthy

Cosmetic paper for application to the skin or for wiping the skin clean
contains inorganic filler...

...Inventor: MATSUMOTO K

Abstract (Basic):

... A cosmetic paper contains 1-30 wt% of an inorganic filler
containing hydroxyapatite.

... The cosmetic paper has a basis weight as measured in
accordance with JIS P-8124 of 5...

...The cosmetic paper is for use for cleaning or wiping the skin...

...The cosmetic paper can wipe off lipids from the skin with a soft
touch, and is pliant...

Technology Focus:

... Preferred Paper: The cosmetic paper preferably has an lipid
absorbance of 1 g/m² or higher...

...Preferred Process : The cosmetic paper is obtained by making paper
from a slurry comprising pulp fibers and inorganic fillers.

MANUFACTURING SYSTEM FOR STICK **COSMETIC**

INVENTOR(s): **GOTO YASUO**

ABSTRACT

PROBLEM TO BE SOLVED: To manufacture easily and in a short time stick **cosmetics** of inputted colors by a stick **cosmetic** manufacturing system to automatically manufacture stick **cosmetics** (lipsticks) of favorite colors.

SOLUTION: The manufacturing system is comprised of a spectrometric apparatus 12...

... the lipstick 14 to be manufactured on the basis of color information inputted, a stick **cosmetic** manufacturing device 20 to manufacture automatically lipsticks 14 on prescription information obtained by the color...

Personal color ordering system for cosmetics retail has network connection

Inventor: GOTO Y ...

Abstract (Basic):

... of the color which is designated through a communication network by a customer. In a **cosmetic** manufacturing system for manufacturing **cosmetics** according to the information which is transmitted from a terminal through the Internet to a server, there is provided a color database in which the color data used for manufacturing **cosmetics** and the color specifying information for specifying the color desired by the customer are related...

...color specifying information inputted from the terminal, the color data retrieved are transmitted to a **cosmetic** manufacturing apparatus, and a **cosmetic** desired by the customer are manufactured, so that the commodity of the color desired by...

... Personal color ordering system for **cosmetics** retail has network connection...

...Title Terms: **COSMETIC** ;
